**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 6 and 7 – 16, drawn to a method of decoding data, classified in class 375, subclass 350.
- II. Claims 17 – 25, drawn to a system for reading and writing information on a channel, classified in class 375, subclass 354.
- III. Claims 26 – 29, drawn to a method for detecting data, classified in class 375, subclass 230.

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination I has separate utility such as decoding data in a receiver, where subcombination II has separate utility such as reading and writing information on a channel in a transceivers synchronizer, while subcombination III has separate utility such as detecting data in a received signal. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a

Art Unit: 2611

continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper and/or the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
